# ACKNOWLEDGEMENT

This Internship is a result of accumulated guidance, direction and support of several important persons. We take this opportunity to express our gratitude to all who have helped us to complete the Internship.

We are thankful to **DR.SANNAHANUMAPPA G, Principal, GOVERNMENT FIRST GRADE COLLEGE SAGARA**, for providing the necessary facilities and for the encouragement to carry out the Internship.

We express our humble gratitude and thanks to **DR.SHIVARAYAPPA K**, Associate Professor and HOD, **Dept of BCA, GOVERNMENT FIRST GRADE COLLEGE** for guiding us and having facilitated us to complete the Internship successfully. We are very thankful to our guide **SHABAZ SHIDENUR**, Asst. Prof. Dept. of **BCA, GOVERNMENT FIRST GRADE COLLEGE** for her constant encouragement, guidance and support throughout the course of the Internship without whose efforts this would not have been possible.

We finally thank to all the Technical Staff for all the support and help while carrying out the project. Last but not the least we wish to thank our friends and parents who have been encouraging us constantly and inspiring throughout the execution of the project.

NAGARAJA G B

### Internship Certificate

This is to certify that MR. NAGARAJA G B (USN. U06GG22S0066) of Government First Grade College, Sagara, studying in 3rd year has successfully completed an internship at TekkyBench.

Duration: **December 10, 2024 – January 25, 2025**

Position: **Web Developer Intern**

During the internship period, they have demonstrated exceptional dedication, enthusiasm, and commitment towards their assigned tasks as a Web Development Intern. They actively participated in the "Project on Flower Delivery Website", showcasing their skills and professionalism.

During this period, the following tasks have been successfully performed:

- Collaborated with the development team to design, develop, and maintain responsive and user-friendly web applications for the assigned project, utilizing modern web technologies and frameworks.
- Assisted in website performance optimization, ensuring fast load times and a seamless user experience, while also conducting thorough testing and debugging to identify and resolve any issues.
- Actively contributed ideas and solutions during team meetings to enhance project outcomes, demonstrating effective collaboration and communication abilities.
- Showed adaptability and willingness to learn new technologies and frameworks while consistently delivering high-quality results.

Throughout their internship, they consistently displayed a strong work ethic, a passion for web development, and a commitment to delivering high-quality results. Their contributions to the project were valuable and greatly appreciated.

We believe that they have shown great potential and a promising future as a Web Developer. It was a pleasure having them as an intern at TekkyBench, and we are confident that they will continue to excel in their career.

This certificate is awarded as recognition of their successful completion of the Web Development Internship program at TekkyBench. We extend our best wishes for their continued growth and success.

## **INTRODUCTION**

## **1.1 INTRODUCTION:-**

Welcome to flowerspot Your Premier Flower Delivery Service At flowerspot, we bring smiles and emotions to life with our fresh and beautifully arranged flowers, delivered right to your doorstep. Whether it's a birthday, Valentine's Day, wedding, anniversary, or a solemn occasion like a funeral, our platform offers a stunning variety of floral arrangements to suit every moment.

Our website is designed with you in mind—easy to navigate, simple to use, and packed with features that make ordering flowers quick, secure, and stress-free. Browse through our curated categories, pick the perfect bouquet, choose your preferred delivery date and time, and even include a heartfelt personalized message.

We offer multiple secure payment options including credit/debit cards, PayPal, and other trusted gateways for your peace of mind. With real-time order tracking and timely delivery updates, you'll always know the status of your order.

Enjoy exclusive features like advanced search, customer reviews and ratings, exciting discounts, and promo codes for our loyal customers. Need assistance? Our dedicated customer support team is available 24/7 via chat, email, or phone to help with anything you need. Experience convenience, reliability, and joy—delivered fresh, only at flowerspot.

## **1.2 COMPANY PROFILE**

TekkyBench – Revolutionary Technological Solutions

TekkyBench – Technologies and Innovation was established with a clear and ambitious purpose: To deliver customized, high-quality technology solutions that align perfectly with the unique demands of our clients.

We understand that no two businesses are alike—and in today's fast-paced digital world, customized solutions are not a luxury, but a necessity. Specializing in small and local businesses, TekkyBench thrives on empowering these enterprises to build a compelling and effective digital presence. By offering cost-effective services without compromising on quality, we ensure our clients are equipped to compete and grow in the digital marketplace.

We emphasize two core principles in every solution we create:

1. Enhancing market reach for our clients' products and services.
2. Digitizing business operations to drive efficiency, productivity, and scalability.

As a forward-thinking tech company, TekkyBench - Technologies and Innovation delivers a broad range of services, including:

Website Design, Development, and Ongoing Maintenance

Search Engine Optimization (SEO) & Social Media Optimization

(SMO) Digital Marketing Campaigns

Mobile Application Development

With a strong focus on innovation, we aim to be recognized as a pioneering software development firm in Bangalore, India. Our mission is to offer unconventional, practical, and innovative solutions that help businesses thrive in an evolving tech ecosystem.

What sets TekkyBench apart is our deep, collaborative approach. We believe true innovation starts with truly listening. Through open dialogue and brainstorming with clients, we often uncover deeper insights that redefine their original vision or reveal untapped opportunities. This agility and client-centric mindset form the foundation of our consulting approach.

### **1.3 ABOUT THE COMPANY**

TekkyBench is a visionary startup transforming education through real-world application. We blend learning with live project experience to shape job-ready professionals. Our platform connects students, local businesses, and freelance educators in one powerful network. Students gain hands-on exposure, sharpen their skills, and receive expert mentorship. We believe in learning by doing—and doing with purpose. Local businesses benefit from affordable, customized digital services. From web design and SEO to logo creation and Android app development—we cover it all. Our solutions help small businesses grow online and reach their ideal customers. Freelance teachers find a platform to teach, earn, and inspire. With a 95% revenue share, educators are truly rewarded for their expertise. TekkyBench bridges the gap between classrooms and careers. We create opportunities for learners and value for businesses—simultaneously. Every project is a chance to learn, build, and make an impact. Our ecosystem thrives on collaboration, innovation, and real-world results. Visit [tekkybench.com](https://tekkybench.com)—where knowledge meets action, and everyone grows together.

### **1.4 PROJECT SCOPE**

#### **1. Digital Flower Shopping Experience:-**

-Users will have the ability to explore a curated catalog of floral products, choose their desired items, and seamlessly complete purchases through a secure online payment system.

#### **2. Diverse Delivery Methods:-**

-The platform will provide various delivery preferences such as same-day service, expedited delivery, and scheduled delivery at specific time slots for maximum convenience.

#### **3. Personalized Floral Orders:-**

-Customers can tailor their purchases by selecting flower types, arrangement styles, color themes, complementary items (like greeting cards or gifts), and leave personalized notes.

### **1.5 OBJECTIVES**

#### **Display Homepage Content**

-Enable visitors to easily access and explore the homepage, showcasing key offerings and updates.

#### **Present Company Information**

-Provide users with a comprehensive overview of the company, its mission, values, and services.

## **Showcase Product Listings**

Allow customers to browse the full range of floral products, including descriptions, images, and pricing.

## **1.6 FEASIBILITY ASSESSMENT**

### **1. Technical Viability:**

**Required Technologies:** Outline the core technical components essential for building the website, including server infrastructure, CMS platforms, online transaction systems, and integration tools for payment processing.

**Development Capabilities:** Evaluate the accessibility of proficient professionals such as web developers, graphic designers, and IT specialists to construct, deploy, and manage the website **effectively**.

### **2. Financial Viability:**

**Budget Evaluation:** Provide a breakdown of anticipated expenditures covering all stages of the project—user interface design, programming, quality assurance, promotional activities, and routine upkeep.

**CHAPTER II**  
**LITERATURE**  
**SURVEY**

## **2.1 HARDWARE REQUIREMENTS**

Selecting the appropriate hardware setup is crucial for the successful operation of the software. Inadequate system resources—particularly low RAM—can lead to reduced performance and system lags. To ensure smooth execution and data management, the system must be equipped with a capable processor, adequate memory, and ample storage space.

### **Server Configuration**

#### **Client Configuration:**

- CPU: Intel Core i3 or above
- RAM: Minimum of 2GB
- Storage: At least 30GB of available disk space

System Requirements: Any standard desktop or laptop capable of running a modern web browser (e.g., Chrome, Firefox, Edge)

## **2.2 SOFTWARE REQUIREMENTS**

1. Server Side
  - HTML
  - CSS
  - PHP
  - MYSQL
2. Client Side
  - Basic Computer with Any web browser installed.

### **HTML – HyperText Markup Language**

HTML (HyperText Markup Language) is the foundational language used to design and structure content on the web. It acts as the skeleton of web pages, organizing text, images, links, and multimedia elements into a readable and interactive format for users.

Together with CSS (Cascading Style Sheets) and JavaScript, HTML forms the core trio of technologies that power most websites on the World Wide Web.

Web browsers interpret HTML files, whether sourced from a server or stored locally, and render them into visually engaging pages. While HTML itself outlines the semantic structure—like headings, paragraphs, and lists—it originally also handled presentation aspects, although modern standards encourage using CSS for styling instead.

HTML consists of elements, each defined by tags enclosed in angle brackets (e.g., <div>, <a>, <img />). These tags tell the browser how to display and organize content. Some tags, like <input />, are self-contained, while others, like <p>, wrap around content and may include nested tags. Moreover, HTML supports the integration of JavaScript to enhance interactivity and dynamic behavior. Styling and layout are handled via CSS, allowing developers to separate content from design.

## **A| Functional Requirements**

### **1. Website Interface Development**

Build an engaging and fully responsive website utilizing HTML, CSS, and JavaScript. Ensure the website performs consistently across various web browsers and devices, including smartphones and tablets.

### **2. Content Creation and Management System**

Implement a user-friendly system for managing web content using front-end technologies. Enable users to add, update, and manage content without technical expertise.

### **3. Optimization for Search Engines**

Structure the website and content using best practices for SEO, including the use of appropriate HTML tags and metadata. Enhance visibility on search engines to increase organic traffic.

## **B| Non-Functional Requirements**

### **1. Site Performance**

The website should load efficiently, with pages rendering in under 3 seconds to enhance user experience. Performance must be optimized to manage large-scale data and heavy user traffic without delays or crashes.

### **2. Data Protection and Security**

Adopt strong security protocols to safeguard sensitive user information and defend against unauthorized access. All data exchanges must occur over encrypted channels using HTTPS and other secure communication standards.

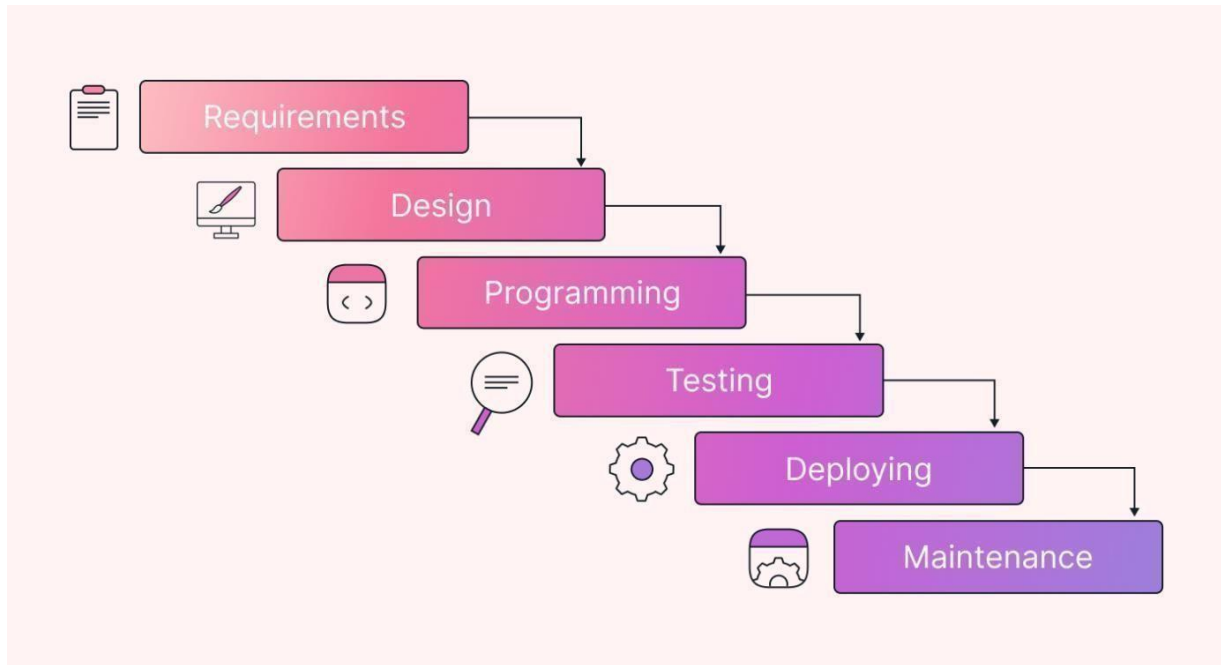

### **3. User Experience (UX)**

The interface must be easy to navigate and designed for a smooth user interaction. Regular usability testing should be performed to gather insights and continuously refine the user experience.

# **CHAPTER III**

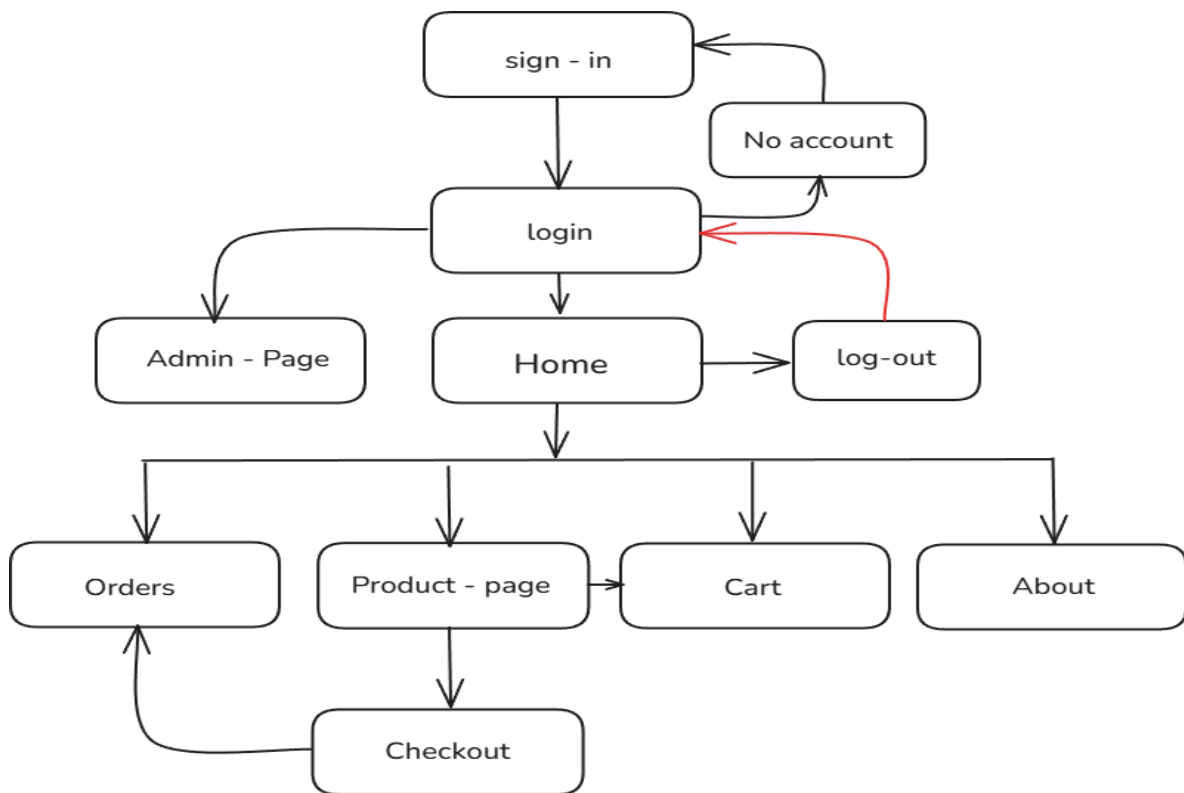

# **PROJECT DESIGN**

## 3.1 DESIGN DETAILS OF MODULES

- **Requirements:** This is the initial phase where the project's goals and objectives are defined. It involves gathering and documenting all necessary requirements for the software.
- **Design:** Based on the gathered requirements, the system's architecture, interfaces, and data structures are designed. This phase outlines how the software will function.
- **Programming:** The actual coding of the software begins in this phase. Developers write the code to implement the design specifications.
- **Testing:** Once the code is written, it undergoes rigorous testing to identify and fix defects. This phase ensures the software meets the specified requirements.
- **Deploying:** The software is deployed into the production environment after successful testing. It's made available to end-users.
- **Maintenance:** Ongoing support and updates are provided to the software. This includes bug fixes, enhancements, and adaptations to changing needs.

## 3.2 ARCHITECTURE DIAGRAM

It appears to be a simple user navigation flow for a website with login functionality.

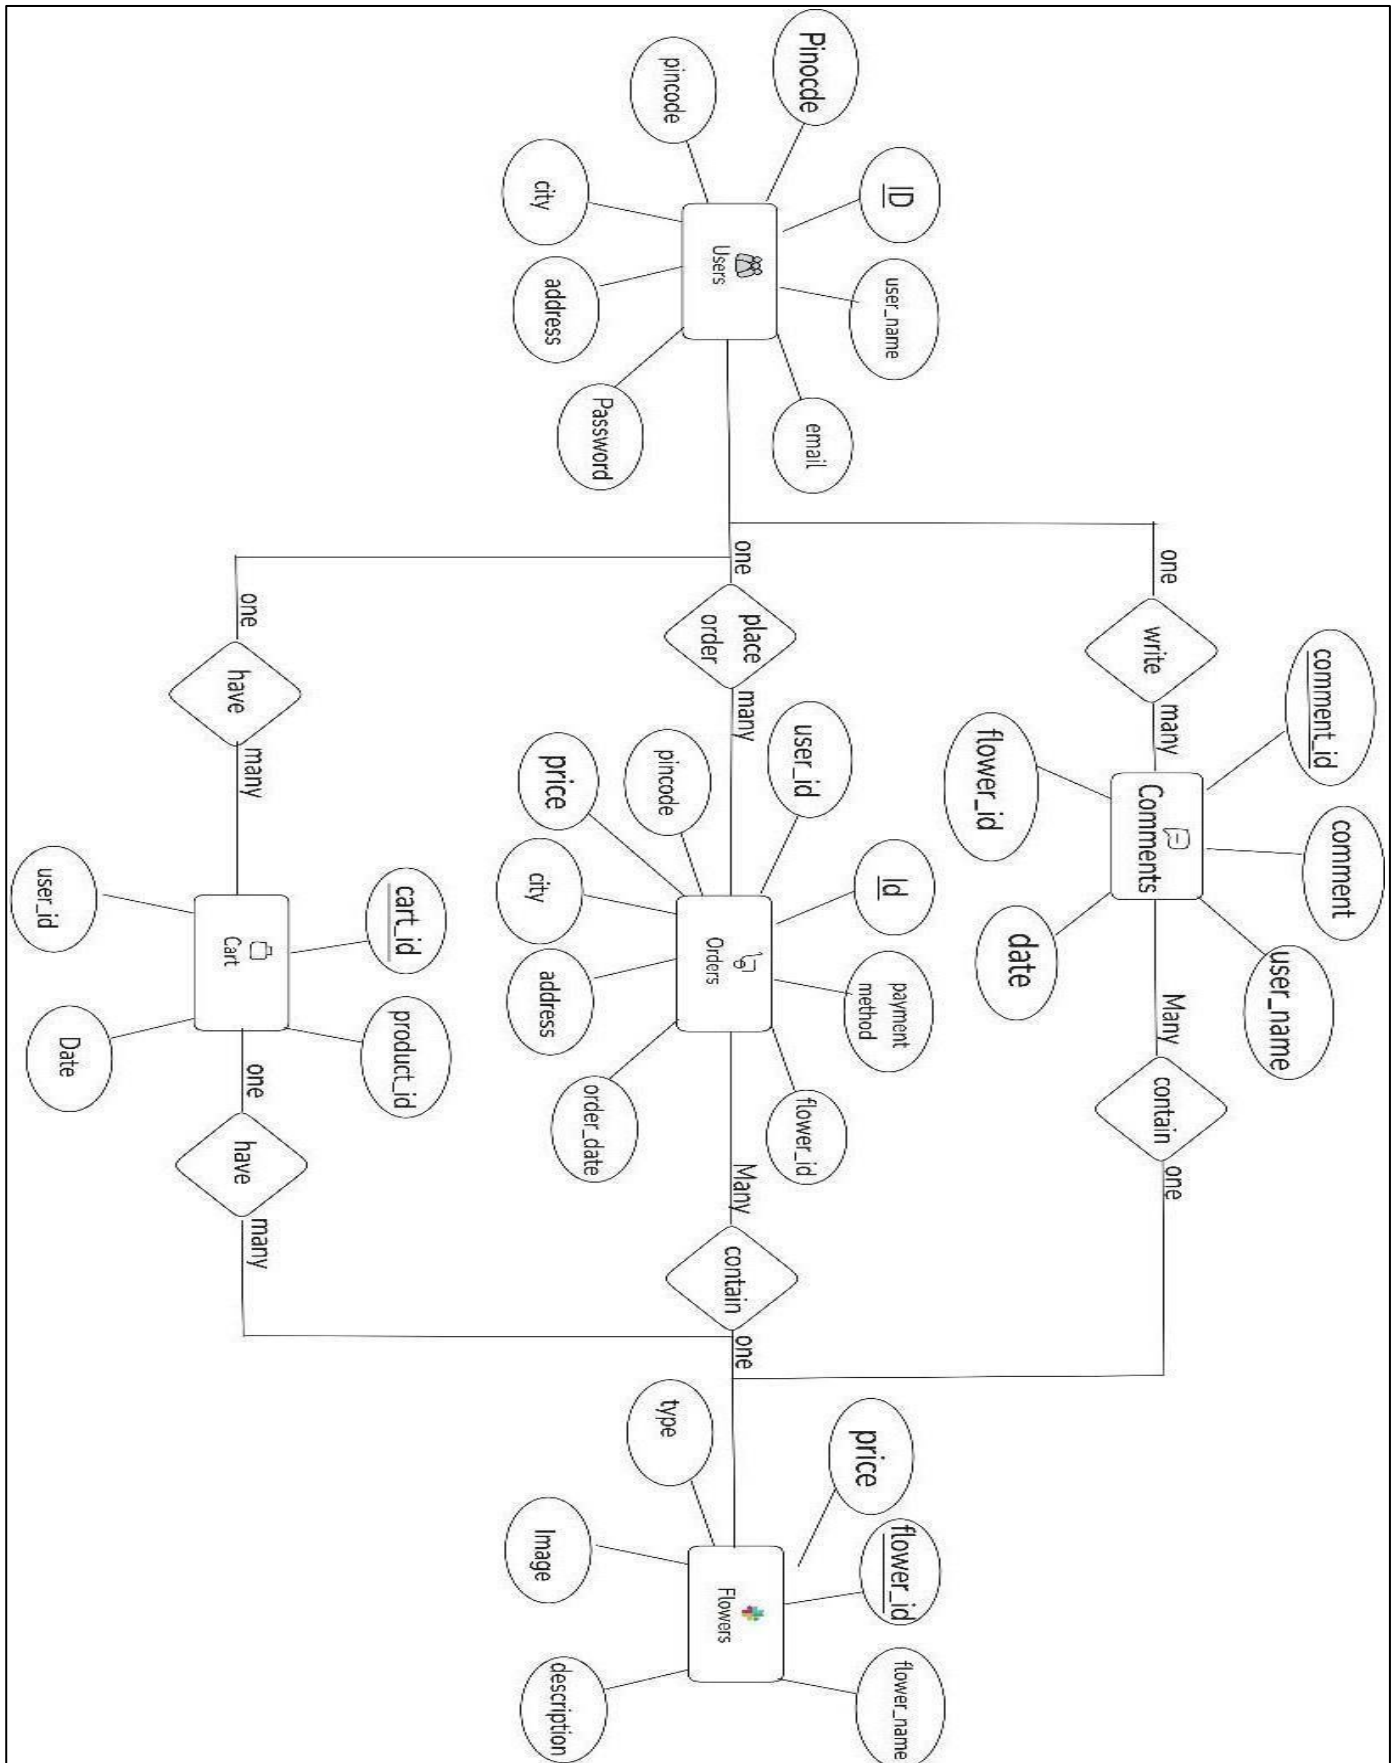

- The flow begins with a Sign-in page that leads to the Login page.
- If the user does not have an account, they are redirected to the Sign-in page from the Login screen.
- After successful login, users are directed to the Home page.
- There's a Log-out option from the Home page, which leads back to the Login page.
- From the Home page, users can navigate to:
  - Orders
  - Product Page
  - Cart
  - About
- From the Product Page, users can proceed to Checkout.
- After Checkout, the flow leads to Orders.
- Admin has his own email and password. If the admin logs in with the correct credentials, they are redirected directly to the Admin Page

**CHAPTER V**  
**DEVELOPMENT AND**  
**IMPLEMENTATION**

## 5.1 Signup

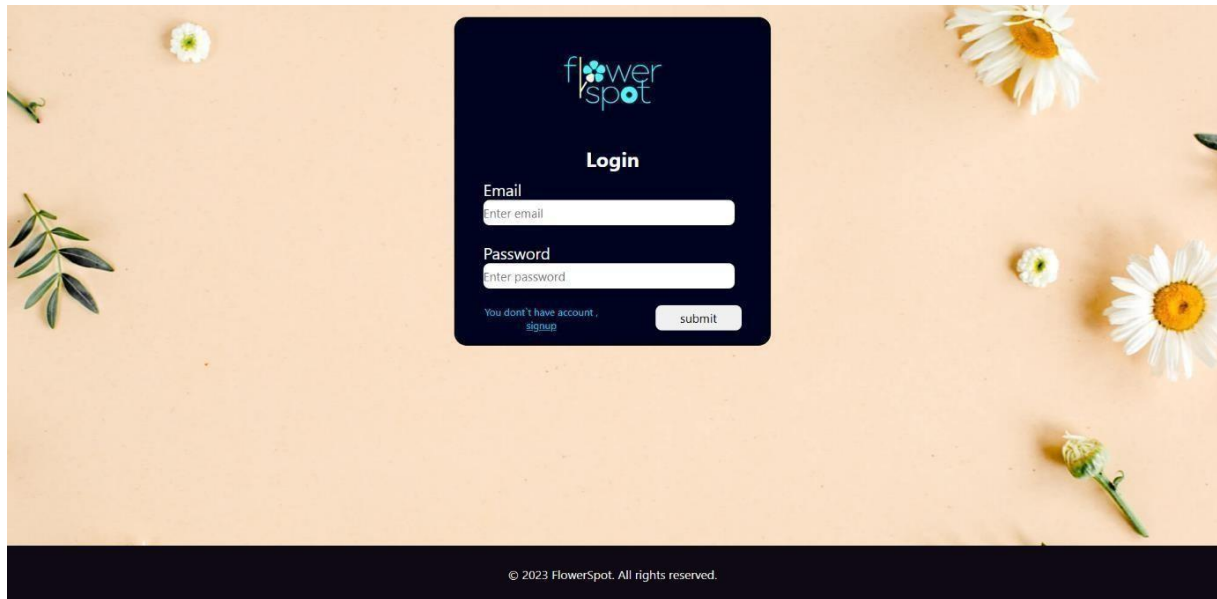

The Signup page offers a clean and inviting interface for new users to create an account on the FlowerSpot website. The page features:

1. **Title:** The word "**Signup**" is displayed in bold and centered within a sleek, dark-themed form container.
2. **Logo:** The **FlowerSpot** logo is placed at the top to maintain brand consistency.
3. **Name Field:** A text input field labeled "**Name**" for the user to enter their full name.
4. **Email Field:** A text input labeled "**Email**" for entering the user's email address.
5. **Password Field:** A text input labeled "**Password**" to securely set a password.
6. **Address Field:** A text field labeled "**Address**" where users can enter their residential address.
7. **City Field:** A field labeled "**City**" for the user to enter the city they reside in.
8. **Pin-code Field:** A text input labeled "**Pin-code**" to enter their area's postal code.
9. **Submit Button:** A light-colored "**submit**" button for submitting the registration form.
10. **Login Link:** A link that says "**You already have account, Login**" which redirects existing users to the login page.
11. **Design Elements:** The background includes light peach tones and scattered daisies, creating a fresh and pleasant visual theme that aligns with the flower shop concept.

This page is designed to make the sign-up process smooth and attractive for new users while keeping the interface aligned with the brand's floral identity.

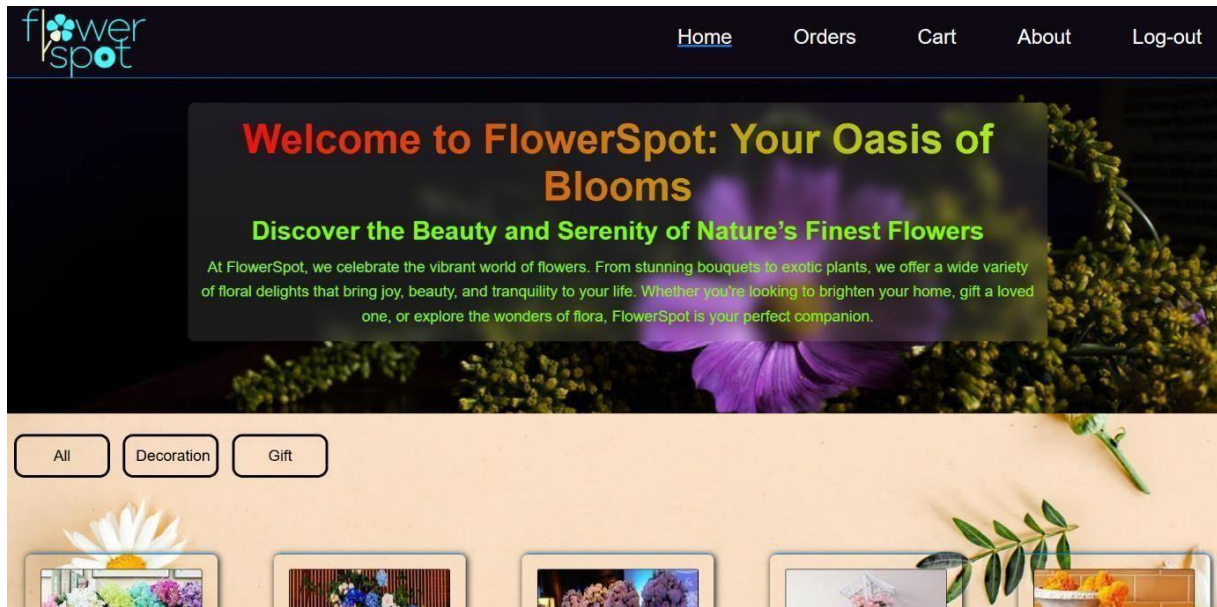

## 5.2 Login

The Login page provides a secure and user-friendly interface for registered users to access their accounts and exclusive content. The page features:

1. **Title:** The word "**Login**" is prominently displayed in bold, centered within a stylish dark box.
2. **Logo:** The **FlowerSpot** logo is placed at the top, reinforcing brand identity.
3. **Email Field:** A text box labeled "**Email**" where users can enter their email address.
4. **Password Field:** A text box labeled "**Password**" for users to securely enter their password.
5. **Submit Button:** A gray "**submit**" button allows users to log in with the entered credentials.
6. **Signup Link:** A small text link beneath the form that reads "**You don't have account, signup**" it likely redirects new users to the registration page.
7. **Footer:** A centered footer note that reads "**© 2023 FlowerSpot. All rights reserved.**", giving it a professional touch.

## 5.3 Home page

### 1. Core Business:

Selling a variety of flower-based decorative items such as garlands, backdrops, wall hangings, and floral arrangements.

### 2. Brand Identity:

The site embraces a theme of natural beauty and tranquility, reflected in the colorful visuals and phrases like “Your Oasis of Blooms” and “Nature’s Finest Flowers.”

### 3. Website Structure:

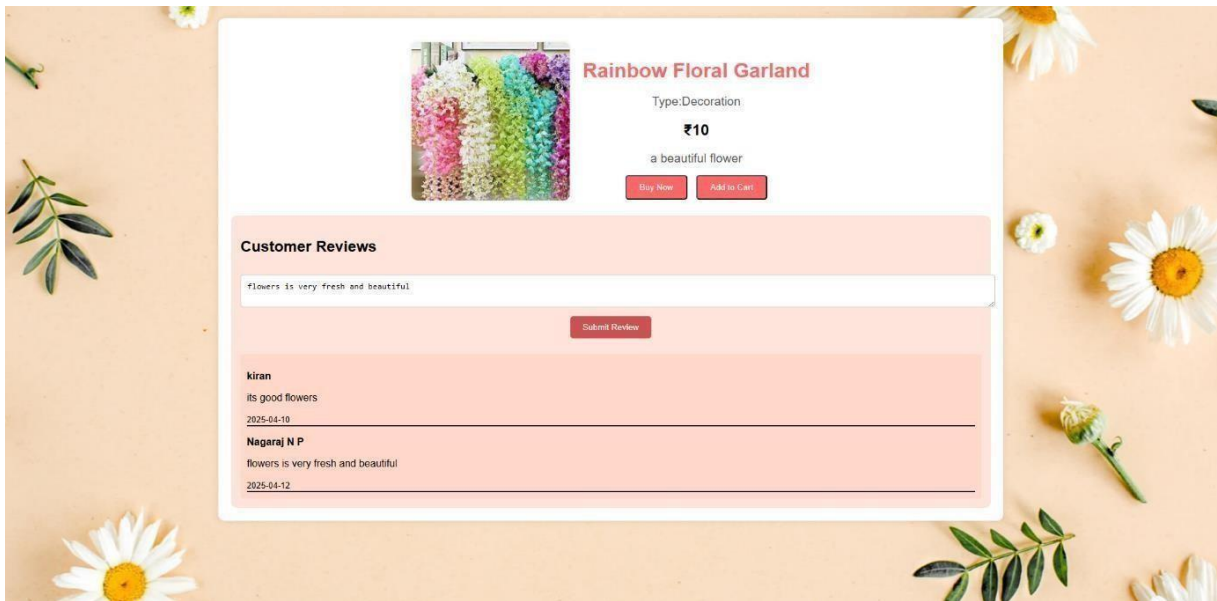

- **Top Navigation Bar:** Includes Home, Orders, Cart, About, and Log-out links for easy access.
- **Hero Section:** Features a bold welcome message with vibrant typography and a call to explore the flower collection.
- **Product Filters:** Buttons like "All", "Decoration", and "Gift" help users filter product categories.
- **Product Grid:** Displays various flower products with names, images, and prices (₹10 to ₹200).

### 4. Call to Action:

Users are encouraged to explore products directly—clicking on any flower card redirects them to the individual **Product Page**, where they can view more details and make a purchase.

## 5.4 Product details page

This webpage is a **product detail page** for a flower item. It includes:

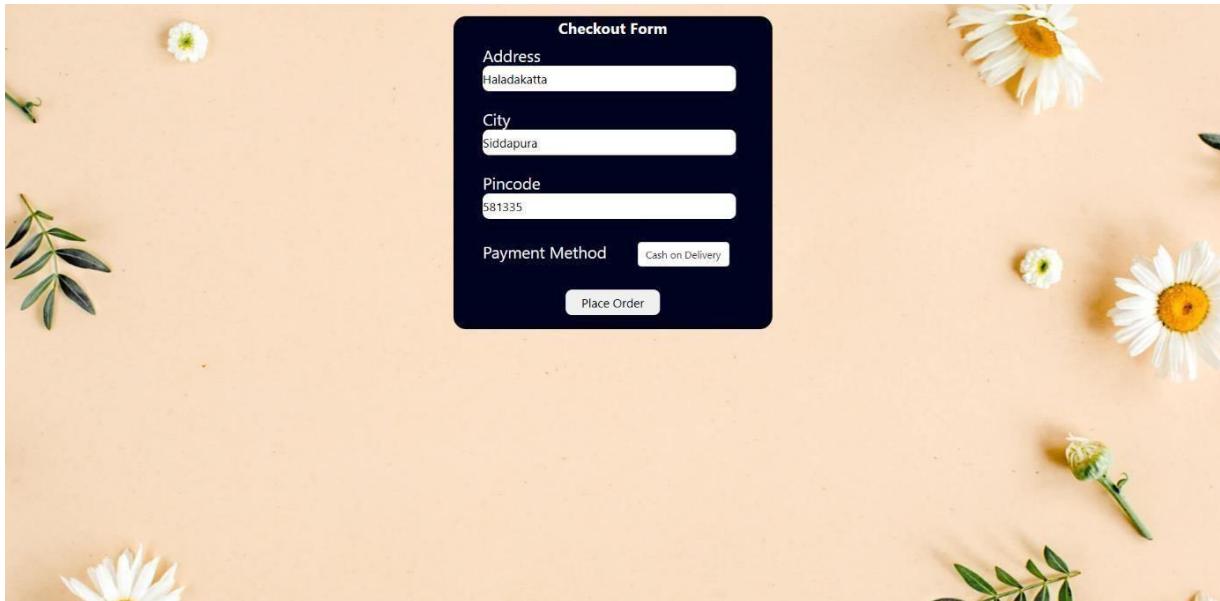

### 1. Product Section

- **Product Image:** Displays the flower (Rainbow Floral Garland).
- **Product Name:** Clearly shown in bold red — *Rainbow Floral Garland*.
- **Type:** Labeled as *Decoration*.
- **Price:** ₹10.
- **Description:** Brief product description — *a beautiful flower*.
- **Action Buttons:**
  - **Buy Now:** Likely redirects to a checkout page for immediate purchase.
  - **Add to Cart:** Adds this item to the user's shopping cart.

### 2. Customer Reviews Section

- **Review Input Box:** Allows users to type in their review.
- **Submit Review Button:** Posts the entered review (stores it in the backend).
- **Displayed Reviews:**
  - Shows the **reviewer's name** (e.g., *kiran*, *Nagaraj N P*).
  - Shows the **comment** (e.g., *its good flowers*).
  - Shows the **date** the review was submitted.

## 5.5 Checkout page

**Checkout Form**

Address  
Haladakatta

City  
Siddapura

Pincode  
581335

Payment Method  
Cash on Delivery

Place Order

### Form Title:

- **Checkout Form** — Centered at the top, indicating the purpose of this form is to collect final delivery and payment details before placing an order.

### Input Fields:

#### 1. Address:

- User has entered: Haladakatta
- This is likely the street or locality for delivery.

#### 2. City:

- User has entered: Siddapura
- The city where the delivery will take place.

#### 3. Pincode:

- User has entered: 581335
- A 6-digit postal code for more precise delivery location.

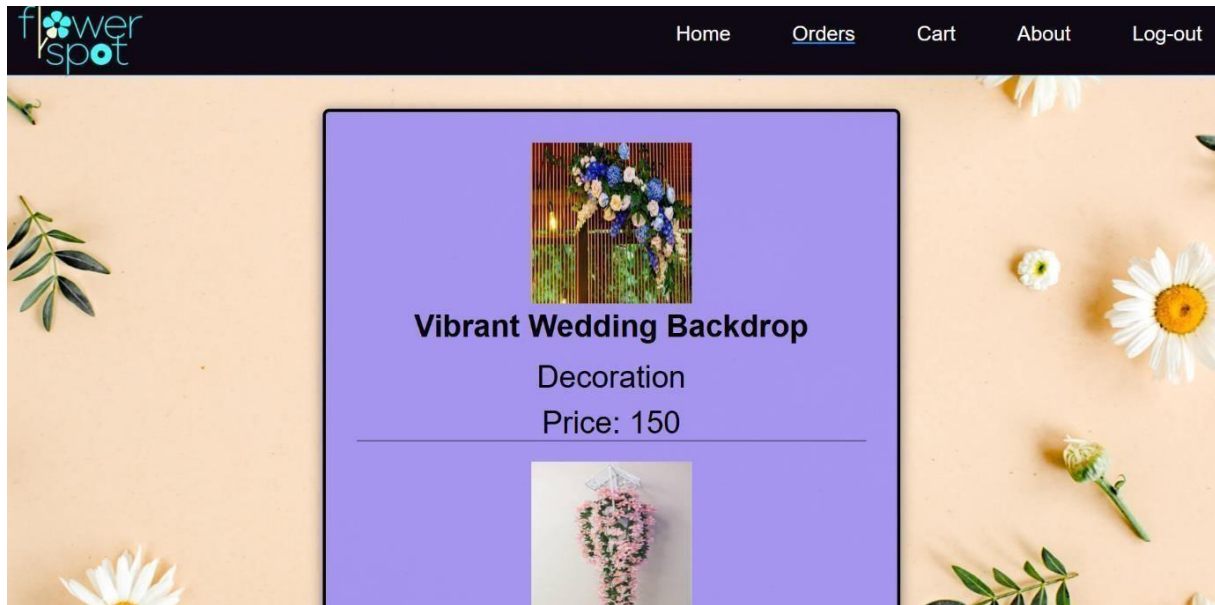

#### 4. Payment Method:

- A button labeled **Cash on Delivery** is shown, suggesting this is the selected or only available payment method on this page.

#### 5. Place Order Button:

- A button labeled **Place Order** is available below the form fields. This would typically trigger submission of the form, saving the order and initiating the delivery process.

## 5.6 Order page

### Header (Navigation Bar):

- **Logo:** Positioned at the top-left, creatively designed with a floral style.
- **Navigation Links (top-right):**
  - Home
  - Orders (highlighted/underlined – current page)
  - Cart
  - About
  - Log-out

This layout helps users easily navigate across the site.

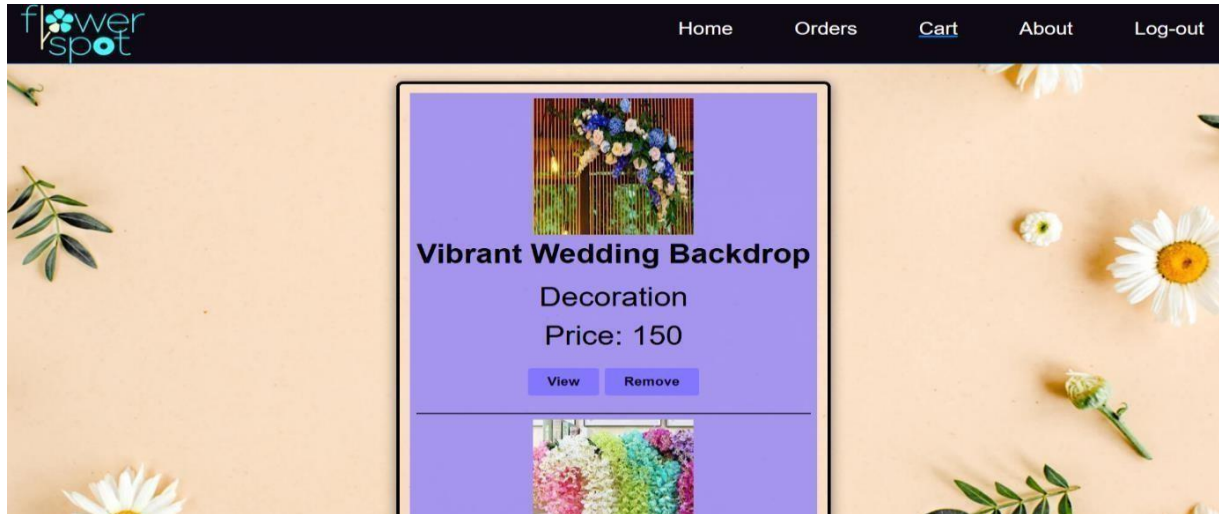

### Orders Section:

- This section is likely displaying **previous orders** made by the user.
- Each order is shown in a **card-like** format with product details.

### Example Order Card (Top One):

- **Image:** Floral wedding backdrop.
- **Title:** Vibrant Wedding Backdrop
- **Category:** Decoration
- **Price:** 150
- A thin horizontal line separates this order from the next.

## 5.7 Cart page

### Header (Navigation Bar):

- **Logo:** Positioned at the top-left, creatively designed with a floral style.
- **Navigation Links (top-right):**
  - Home
  - Orders (highlighted/underlined – current page)
  - Cart
  - About
  - Log-out

### Cart Page Content

This section displays the items the user has added to their cart, with individual product cards.

#### Cart Item Card Example:

- **Image:** A product image of a vibrant wedding floral backdrop.
- **Title:** Vibrant Wedding Backdrop
- **Category:** Decoration
- **Price:** 150

#### Actions Available for Each Cart Item:

- **View:** Navigates to the product's detail page.
- **Remove:** Removes the item from the cart.
- These are styled as clean, purple buttons for user interaction.

## 5.8 Admin section

The screenshot displays the admin interface of the Flower-Spot website. On the left, there is a dark blue 'Add products' form with the following fields: 'Flower Name' (with a placeholder 'Enter flower name'), 'Flower description', 'Flower price' (with a placeholder 'Enter flower price'), 'Flower image (jpeg , jpg , png)' (with a 'Choose File' button and 'No file chosen' text), and 'Flower type'. A 'submit' button is at the bottom. On the right, the 'Order details' section shows two orders. Order 1, dated '2025-04-07 23:46:34', includes a thumbnail of a wedding backdrop, customer name 'Nagaraj N P', flower name 'Vibrant Wedding Backdrop', price '₹150', payment method 'cod', and address 'Haladakatta - Siddapura - 581335'. Order 2 is partially visible below, dated '2025-04-08 23:36:45'.

### 1. Add Products Section (Left side)

This form is used by an admin or vendor to add new flower products to the website. The fields include:

**Flower Name:** Input field for entering the name of the flower.

**Flower Description:** A short description of the flower product.

**Flower Price:** The price at which the flower is being sold.

**Image Upload:** Allows the user to upload an image of the flower (jpeg, jpg, png formats supported).

**Flower Type:** Field for specifying the category or type of the flower.

**Submit Button:** Likely sends the form data to a backend server to save the flower in the product database.

### 2. Order Details Section (Right side)

This displays the customer's order details, likely pulled from a database. It includes:

**Order Timestamp:** Shows when the order was placed (e.g., 2025-04-07 23:46:34).

**Image of Ordered Flower:** A thumbnail of the flower that was ordered.

**Customer Name:** E.g., Nagaraj N P.

**Flower Name:** Name of the flower product (e.g., Vibrant Wedding Backdrop).

**Flower Price:** The price of the flower (e.g., ₹150).

**Payment Method:** Here it is shown as cod (Cash on Delivery).

**Address:** Includes fields such as address, city (Siddapura), and pincode (581355).

# **CHAPTER VI**

# **TESTING**

## 6.1 SYSTEM TESTING

### INTRODUCTION

System testing is also known as black-box testing because it focuses on the external parts of the system. It takes place after [integration testing](#) and before the [acceptance testing](#). So this testing detects the issues within the integrated units of a system. In this way, it checks the design of the complete system and behavior per the end user's needs.

**System Testing** is a level of testing that validates the complete and fully integrated software product. The purpose of a system test is to evaluate the end-to-end system specifications. Usually, the software is only one element of a larger computer-based system. Ultimately, the software is interfaced with other software/hardware systems. System Testing is defined as a series of different tests whose sole purpose is to exercise the full computer-based.

## Functionality Testing

### 1. Navigation:

- Menu items are clickable and navigate to correct pages
- Submenus and dropdowns work correctly

### 2. Forms:

- Contact form sends email to correct address
- Form validation works correctly (e.g., required fields, email format)

### 3. Calls-to-Action (CTAs):

- CTAs are clickable and navigate to correct pages
- CTAs have correct text and formatting

### 4. Links:

- Internal links navigate to correct pages
- External links open in new tab/window

### 5. Search:

- Search bar returns relevant results
- Search bar has correct placeholder text

## Usability Testing

### 1. Content:

- Content is clear, concise, and easy to read
- Content is optimized for SEO (meta tags, headings, etc.)

### 2. Visuals:

- Images are high-quality and relevant to content
- Images have correct alt text and descriptions

### 3. Layout:

- Layout is responsive and works on various devices
- Layout is consistent throughout website

### 4. Accessibility:

- Website is accessible for users with disabilities (WCAG 2.1)

- Website has clear and consistent navigation

## **Performance Testing**

### 1. Page Speed:

- Website loads within 3 seconds
- Website has optimized images and code

### 2. Browser Compatibility:

- Website works correctly in various browsers (Chrome, Firefox, Safari, etc.)
- Website works correctly in different browser versions

### 3. Mobile Responsiveness:

- Website is responsive and works on various mobile devices
- Website has correct layout and formatting on mobile

## **Content Testing**

### 1. Spelling and Grammar:

- Content has no spelling or grammar errors

### 2. Consistency:

- Content is consistent throughout website
- Content has correct formatting and styling

### 3. Accuracy:

- Content is accurate and up-to-date
- Content has correct information and statistics

## **Database Testing**

The MySQL database was thoroughly tested for:

1. Data Integrity: Ensured consistent storage of user, product, and order data.
2. Query Accuracy: Validated the correctness of SELECT, INSERT, and UPDATE queries.
3. Security: Confirmed that sensitive data like passwords is stored securely, ideally hashed.

This comprehensive testing checklist ensures that our website for digital marketing is functional, user-friendly, performant, secure, and has high-quality.

## LOGIN PAGE

## SIGNUP PAGE

A dark blue rectangular signup form is centered on a light orange background decorated with white daisies and green leaves. The form has the 'flower spot' logo at the top, followed by a 'Signup' title. It contains six input fields: Name, Email, Password, Address, City, and Pin-code, each with a placeholder text. At the bottom left, there is a link for existing users, and at the bottom right is a 'submit' button.

# **CHAPTER VIII**

# **CONCLUSION**

## **CONCLUSION**

In conclusion, our Flower Spot website represents a dynamic and engaging platform designed to enhance the online experience for flower enthusiasts and businesses alike. The project aimed to bridge the gap between florists and customers by creating a responsive, user-friendly web application with seamless backend integration. With features such as product listings, user authentication, order management, and an intuitive UI, the Flower Spot site streamlines the process of browsing and purchasing floral products.

Throughout the development process, our team demonstrated strong collaboration, technical skills, and a passion for delivering a high-quality product. By leveraging modern web technologies and best practices in both frontend and backend development, we successfully created a scalable and functional solution that addresses real user needs.

This project not only allowed us to apply our technical knowledge in a practical setting but also gave us valuable insights into teamwork, agile development, and deployment strategies. We believe Flower Spot can serve as a solid foundation for future expansion in the online floral marketplace.

## **Recommendations for Future Improvement**

To further enhance the functionality and user experience of the Flower Spot platform, we suggest the following:

- **Integrate Payment Gateway:** Implementing secure payment options will provide a complete e-commerce experience.
- **Add Product Reviews and Ratings:** Allowing customers to leave feedback will build trust and improve product transparency.
- **Enhance Admin Panel:** A more robust admin dashboard with analytics and inventory management features can improve backend operations.
- **Implement Real-Time Notifications:** Use real-time alerts for order updates, new offers, and customer queries.
- **Mobile App Integration:** Expanding to a mobile app could improve accessibility and user engagement.
- **Search Engine Optimization (SEO):** Optimizing the site for search engines can attract more organic traffic and improve visibility.
